H&L Style

Suitable for smaller machinery, H&L tooth systems use a one piece horizontal metal pin with a strip of rubber through the middle. The rubber works to reduce vibration and enhance flexibility. These teeth offer outstanding performance and durability.

HENSLEY STYLE

Best known for its unique parabolic design, Hensley bucket teeth incorporates a vertical one piece pin. The curved-in design of the tooth matches the shaped extension of the adaptor to ensure a locking fit. Hensley teeth improve digging performance by absorbing impact loads and is easily installed onsite.

CUTTING BLADES

- Universal blades
- Grader Blades
- Loader Blades
- Doser Blades
- Scraper Blades

ARROWHEAD

Arrowhead cutting blades are welded straight on to the bucket and apply extra protection to the bucket lip. Harder wearing, through hardened steel is used for harsher conditions.

DOUBLE BEVEL

Precision cutting blades that are reverse edged to provide double the amount of wear protection. 6 inch hole centers.

SINGLE BEVEL

Ideal for bucket lip replacement and produced with through hardened steel. Available as pre-drilled base edge.

Universal Double Bevel Bolt-on
